### MEMORANDUM

SUBJECT: Revised Use Closure Memorandum for Endosulfan

TO: Diana Locke  
Reregistration Branch II  
Health Effects Division

FROM: Phil Budig  
Special Review Branch  
Special Review and Reregistration Division

The list of endosulfan uses to be included in the risk assessment is revised to read as follows:

**Food Uses:** almonds; apples; apricots; barley; beans (succulent and dry, not including limas); blueberries; broccoli (but not Chinese); brussels sprouts; cabbage; carrots; cauliflower; celery; cherries; cherry nursery stock dip; citrus (non-bearing and nursery stock only); collards; sweet corn (fresh only); cotton; cucumbers (but not greenhouse); eggplant; filberts; grapes; kale; lettuce; macadamia nuts; melons; mustard greens; nectarines; oats; peaches; peach nursery dip stock; pears; peas (succulent); pecans; peppers; pineapples; plums; plum nursery dip stock; potatoes; pumpkins; prunes; raspberries; rye; spinach; squash (summer and winter); strawberries; sugarcane; sweet potatoes; tea; tobacco; tomatoes; turnip greens (not turnips); walnuts; wheat

**Outdoor Ornamental Uses:** Ornamental plants, ornamental trees and shrubs

**Commercial Greenhouse Use:** Ornamental plants, tomatoes

The following uses have been proposed for deletion, at the request of all endosulfan technical producers. At the end of the 30 day comment period, all these uses will be deleted unless another party indicates a willingness to support any of these uses within the 30 day comment period. However, until the comment period closes and any potential support has been declared, these uses are considered supported.

**Food:**

Citrus Fruits (Except Non-Bearing Trees and Nursery Stock)  
Clover-Forage (Except Grown for Seed Only)  
Corn Field/Forage  
Endive  
Evening Primrose  
Garden Beets  
Garlic
